

Coast

The coast style comes in many forms but always harbours a relaxed, fresh and energising feel. Lightness is key, a light to white platform as a base and subtle overtones layered. Extreme texture gives a sense of warmth and age. The décor is crafted from natural fibres; rattan, rustic bleached timbers, wicker and then blended with cottons, linens, canvas and pale leathers. Your sanctuary draws on inspiration from nature, the tones and finishes pulled from the trees, pebbles, sand, water and skylines.

TOP TIP

Keep colours minimal if bold, two is a wise number. Lighter tones rely on layering and texture for success.
